

The diagram illustrates the distribution of soil nutrient regimes (A, B, C, D, E) across different soil types (Bl, Acb, Hm, Act, Ws, Sxl, At) and their relative frequencies (1-5). The regimes are represented by colored boxes, and the soil types are represented by text labels within the boxes. The relative frequency of each regime is indicated by a number in the top right corner of the box.

Regime	Soil Type(s)	Relative Frequency
A	(Bl, Acb, Hm, Act)	4
B	*Bl* (Hm)	1
C	*Bl* (Hw, Hm)	5
D	*Bl* (Sxl, At)	3
E	(Bl)	1

Relative Soil Moisture Regime
